Hypo:

A Threat is a choice of a Randomized  
Strategy: a Risk (highest prob of coming out)  
(VN-M: see the limits of VN-M utility  
apply K/T weights?)

when coming out the threatened ("pretended")  
strategy has a prob  $P > \frac{1}{2}$  or  $P < 1$

dependent on: - action of the other (threatened)

- Other: (Cuba, - CE  
subordinates, - CE)

- the effort of  
one's preferences

and posture / posture

+ "commitment"

on one's alternatives

info

perceptions

attitudes, values

beliefs, ideology

(e.g. "I control

Castro, subordinates

(can't trust, negot...)

reflexes, habits

"Detent Machine": its "use" is incompatible  
with continuation of human life

The risk (threat) of its use is judged worthwhile  
to lower risk of subordination (of "allies"! ) to SU.

(ultimately, ourselves).

Axiom: it is less dangerous to have 2 such machines

= existence than one. Less danger of what? 1) Sublim 2) War

2) What kind of Machine - How big? 3) Who Has Them - How Observed
